

Dear FCC, Please keep the Hearing Aid Compatibility rule for mobile phone. As a 48-year-old fulltime employee with a severe hearing loss, hearing aid compatibility of my employer's and family's phones, including mobile/cell phones, is very important. As a large number of Americans enter middle age and senior years, telephone compatibility with hearing aids will become increasingly important. Any telephone manufacturer who seeks to avoid compatibility issues for short-term cost benefits will be hurt long-term as millions of us turn to those manufacturers who will supply Hearing Aid Compatible (HAC) equipment. Thank you for receiving my comments.  
Martha Meyer
